

Advanced Training in understanding the
Safety of Nanomaterials

NANOgentools Autumn EU School

The event will be held at Burgos, Spain

📍 [Hotel Rice Palacio de los Blasones](#)

OBJECTIVES:

- Awake the curiosity of young researchers in the related subject.
- Create a creative, intergenerational forum to discuss the development of nanoscience and its implications on human and environmental health.
- Highlight the advantages of MSCA RISE perspective, showing the main hits gathered in the frame of the project thanks to the potential of interinstitutional cooperation.
- Discuss the need of regulation and safety for the 21st Century generation of Nanotech-based products and materials.
- Train the next generations in advanced techniques for nanosafety assessment, guiding them into the key concept of "Safe by Design".

Website of the event: www3.ubu.es/iccrum/nanogentools-eu-school.

All participants are encouraged to take part in the "El Cid Weekend" (Medieval celebration) that will be held in Burgos between the 29th of September and the 1st of October.

Updated information of the event will be soon uploaded to the website:
